

Medicare Part B Step Therapy

The drugs on this list require step therapy.

Step therapy means you must try one drug before we will cover another drug. Before we cover certain drugs, you must first try a different or less expensive drug. If the first drug does not work, then we will cover the second drug.

You can ask for an exception if you think you need a step therapy drug. Your prescriber or your authorized representative may also ask for an exception. For information on how to ask, please see your Member Handbook.

Step therapy applies if the drug has not been used in the past 365 days.
